October 21, 2009

Kirby,

We have been unable to get the EPA to remove the vermiculite from our building in Libby, Montana. Our building is the old Libby Hotel. It is a huge building (3 stories high) and is absolutely full of vermiculite insulation. My Mom lived there in a small apartment for twenty-seven years, however she passed away in April and now the building is empty.

We would like to sell the property but to proceed we need to have it properly cleaned. This has got to be the most contaminated building in Libby. Something needs to be done.

Thanks so much for your consideration.

Most Sincerely,

Candy Johnson
